

/ SPIRAL ELECTRO

Structure

Flexible protective hoses manufactured from PV-V0 thermoplastic material, ensuring high flame resistance. Designed in accordance with international standards IEC 61386-1 (CEI 23/80) and IEC 61386-23 (CEI 23/83).

Applications

Suitable for the protection of exposed electrical cables on walls and ceilings, as well as for installations within suspended ceilings and raised floors

Notes

High flexibility

Struttura

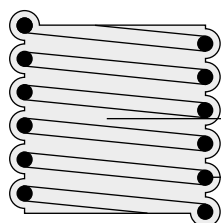

Tubi protettivi flessibili realizzati in materiale termoplastico PV- V0. Rispondenti alle norme internazionali IEC 61386-1 (CEI 23/80) e IEC 61386-23 (CEI 23/83).

Applicazioni

Protezione cavi elettrici in vista a parete e soffitto oppure all'interno di controsoffitti e pavimenti flottanti

Note

Alta flessibilità

SINGLE SPIRAL / SPIRALE SINGOLA

Plasticised PVC / PVC plastificato

Rigid PVC spiral / Spirale in PVC rigido
